Explanation, Features and Development of College Website

Student Name: Ekansh (Roll No: 26001039) | **Branch:** B.Tech – CSM (1st Semester) | **College:** DR. RVR NRI Institute of Technology

1. Introduction

The given code is used to develop a **College Information and Admissions Website** (`02-college.html`) for **DR. RVR NRI Institute of Technology, Vijayawada, Andhra Pradesh**, designed and developed by **Ekansh**, a first-year B.Tech (Computer Science and Machine Learning – CSM) student.

The website is created using **HTML5** and **CSS3**. It presents the engineering institution's profile, institutional pillars, academic departments and courses, faculty and academic support, campus facilities, student events and activities, an interactive student admission enquiry form, a college information table, and official contact details in a structured and user-friendly manner.

The website uses a warm cream background (`#fff8f2`) paired with a dark espresso brown header and footer (#292522) and vibrant orange highlights (#e8752b, #c85b1b, #b94d12). It is also designed with a mobile media query so it adapts smoothly across desktops, tablets, and smartphones.

2. Explanation of the Code

The website is developed using two main front-end web technologies: **HTML** and **CSS**.

A. HTML (HyperText Markup Language)

HTML is used to structure the institutional content, navigation links, course and facility cards, student enquiry form, and summary table. The main HTML elements used in `02-college.html` are:

HTML Element	Purpose in DR. RVR NRI Institute of Technology Website
`<!DOCTYPE html>`	Declares the document as an HTML5 webpage.
`<html>`	Defines the root element of the HTML document.
`<head>, <title>`	Contains page settings, internal CSS styles, and sets the browser tab title to *"DR. RVR NRI INSTITUTE OF TECHNOLOGY"*.
`<body>`	Contains all visible content of the college website.
`<header>`	Displays the college name, location (*Vijayawada, Andhra Pradesh*), and motto (*Knowledge* | *Skills* | *Success*).
`<nav>`	Provides navigation links to `About`, `Departments`, `Facilities`, `Activities`, `Admissions`, and `Contact`.
`<div>`	Groups sections and card layouts (`.hero`, `.stats`, `.section`, `.course-list`, `.facility-list`, `.form-box`).
`<h1>, <h2>, <h3>`	Displays the main institutional title, section headings, and card titles.
`<p>, <b>`	Displays descriptive text, introductions, and bold labels in the contact section.
`<a>`	Creates navigation links, the *"Explore Admissions"* button, and *"Course Enquiry →"* links.
`<ul>, <li>`	Lists key academic support pillars (Classroom learning, Practical education, Academic guidance).
`<form>, <label>`	Creates the interactive *Student Enquiry Form* and accessible field labels.
`<input>, <textarea>`	Collects Student Name (`text`), Email Address (`email`), Phone Number (`tel`), and Enquiry Message.
`<select>, <option>`	Creates the dropdown menu to choose a course (*Computer Science, Computer Science*

B. CSS (Cascading Style Sheets)

CSS is used to control the institutional color scheme, typography, card grids, form input alignment, and mobile responsiveness. The important CSS properties used in `02-college.html` are:

CSS Property	Purpose in DR. RVR NRI Institute of Technology Website
`background-color`	Sets backgrounds for the body (`#fff8f2`), header/footer (`#292522`), hero/panels (`#fff0e3`), and buttons (`#e8752b`).
`color`	Defines text colors for body text (`#303030`), section headings (`#b94d12`), and white header/button text.
`font-family`	Sets a clean sans-serif font (`Arial, sans-serif`) across the page and form controls.
`margin & padding`	Centers sections horizontally (`margin: 28px auto`) and adds internal spacing inside cards, tables, and forms.
`display: flex & flex-wrap`	Aligns the header, 3 stat cards (`.stats`), 3 course cards (`.course-list`), and 4 facility cards (`.facility-list`).
`flex & min-width`	Ensures cards share row width equally (`flex: 1`) and wrap neatly onto new lines when screen width narrows.
`border-top & border-left`	Adds distinctive orange accent bars to course cards (`border-top: 4px solid #e8752b`) and events (`border-left: 5px solid #e8752b`).
`border-radius`	Rounds the corners of buttons (`5px`), facility cards (`6px`), course cards (`8px`), and main sections (`10px`).
`box-sizing: border-box`	Ensures `100%` width form inputs, selects, and textareas stay neatly inside `.form-box` without overflowing.
`max-width`	Limits the hero text width (`750px`) and centers the Student Enquiry Form container (`max-width: 430px`).
`border-collapse: collapse`	Creates crisp single-line borders in the College Information table.
`:hover pseudo-class`	Provides interactive color transitions on navigation links, the main CTA button (`#b94d12`), course links, and submit button.
`@media (max-width: 600px)`	Adapts the header alignment, hero heading size (`29px`), nav link spacing, and section widths (`90%`) for mobile devices.

3. Features of the Website

1. Header, Navigation Bar, Hero Section & Institutional Pillars (.stats)

Displays the dark-brown institutional header (`DR. RVR NRI INSTITUTE OF TECHNOLOGY — Vijayawada, Andhra Pradesh`) with the motto *"Knowledge | Skills | Success"*, a 6-link navigation bar, a warm welcome banner (*"Learn. Innovate. Build Your Future."*) with an `Explore Admissions` button, and three highlight cards:
Learn
(Build Knowledge),
Explore
(Develop Skills), and
Grow
(Reach Your Goals).

2. About Our College Section (#about)

Introduces DR. RVR NRI Institute of Technology in Vijayawada, Andhra Pradesh, summarizing its academic departments, campus facilities, and admission enquiry process.

3. Departments and Courses Section (#courses)

Presents three engineering programs in top-bordered cards:
Computer Science
(Programming, computing and software development),
Computer Science and ML

4. Development of the Website

The College Information and Admissions Website is developed through the following steps:

Step 1: Create the HTML file — Create a file named `02-college.html`. Define the document structure and add the institutional header, navigation bar, hero section, stats row, content sections (`#about`, `#courses`, faculty support, `#facilities`, `#events`, `#admissions`, college table, `#contact`), and footer.

Step 2: Add CSS styling — Inside the `<head>` section, add a `<style>` block setting the warm cream background (`#fff8f2`), dark brown header/footer (`#292522`), orange accent colors (`#e8752b`, `#c85b1b`), section borders, and button hover effects.

Step 3: Design the card sections — Use CSS Flexbox (`display: flex; flex-wrap: wrap;`) to arrange the 3 pillar cards (`.stats`), the 3 department cards (`.course-list`), and the 4 campus facility cards (`.facility-list`).

Step 4: Build the Student Enquiry Form & College Table — Inside `#admissions`, build a centered `.form-box` containing labeled `<input>`, `<select>`, and `<textarea>` elements with `required` validation, followed by a bordered `<table>` for college details.

Step 5: Make the website responsive — Add a `@media (max-width: 600px)` rule to center the header text, scale the hero heading to 29px, and expand `.section` and `.stats` widths to 90% on mobile screens.

Step 6: Test the website — Open `02-college.html` in a web browser. Test all navigation links, course enquiry jumps, form input validation, button hover states, and mobile screen resizing.

5. Website Folder Structure

Keep the files organized in your project directory and GitHub repository as shown below:

```
Ekansh-College-Website/ ├── 02-college.html # College Website structure, enquiry form, and internal CSS ├── 01-portfolio.html # Project 01: Ekansh Personal Portfolio Website ├── 03-student.html # Project 03: Student Academic Dashboard (Roll No: 26001039) ├── README.md # GitHub repository documentation and project guide └── College_Website_Documentation.pdf # Complete explanation, features, output, and code PDF
```

6. Technologies Used

Technology	Usage
HTML5	Creates the institutional sections, headings, lists, admission form, and summary table.
CSS3	Controls the warm orange/espresso color palette, typography, borders, and spacing.
CSS Flexbox	Aligns the header, 3 institutional stat cards, 3 course cards, and 4 facility cards.
HTML5 Forms	Provides interactive text, email, phone, select dropdown, and textarea controls with validation.
Media Queries (`@media`)	Adapts the layout, typography, and container widths for screens under 600px.
Web Browser	Displays and runs the static front-end website directly on any device.

The website is a static front-end web application. It uses native HTML5 client-side form validation (`required`, `type="email"`, `type="tel"`) and runs smoothly in any modern browser without requiring external libraries.

7. Advantages of the Website

1. Presents complete institutional information for DR. RVR NRI Institute of Technology in one place.
2. Highlights engineering departments (CSE, CSM/AI-ML, Electronics) clearly for prospective students.
3. Showcases campus infrastructure including Library, Computer Labs, Classrooms, and Sports.
4. Includes a dedicated, user-friendly Student Enquiry Form for admission interest.
5. Provides smooth anchor navigation from course cards directly to the admission form.

9. Output (Part 1 — Header, Hero, Courses, Faculty & Facilities)

Below is the rendered browser output of the top and middle sections of `02-college.html`:

DR. RVR NRI INSTITUTE OF TECHNOLOGY

About Our College

DR. RVR NRI Institute of Technology is an engineering institution located in Vijayawada, Andhra Pradesh. This website introduces the institution, academic departments, facilities and admission enquiry process.

Departments and Courses

Explore different areas of engineering and technology.

Computer Science
Programming, computing and software development.
Course Enquiry →

Computer Science and ML
Artificial intelligence and machine learning concepts.
Course Enquiry →

Electronics
Electronic systems and communication technology.
Course Enquiry →

Faculty and Academic Support

Faculty members support students through academic teaching, practical activities and guidance to develop technical skills.

- Classroom learning
- Practical education
- Academic guidance

Campus Facilities

Library
Books and study resources.

Computer Labs
Programming and practical learning.

Classrooms
Spaces for academic education.

Sports
Activities and teamwork.

9. Output (Part 2 — Events, Admission Form, Info Table, Contact & Footer)

Below is the rendered browser output of the bottom sections of `02-college.html` including the interactive Student Enquiry Form:

Events and Student Activities

Learn Beyond the Classroom

Workshops, technical presentations, cultural programmes and sports activities help students develop communication, creativity and teamwork.
